**PLUS: How to make conservatism great again
America's best police chief**

A portrait of Professor Atiba Ellis, a Black man with a goatee, wearing a grey suit, white shirt, and purple tie. He is smiling and looking slightly to the right. The background is a blurred hallway with warm lighting.

PROFESSOR OF LAW, **ATIBA ELLIS**

U.S. Commission on Civil Rights
W.Va. State Advisory Committee

DEFENDING THE DEFENSELESS.

At West Virginia University, we measure success in lives changed. That's how Law Professor Atiba Ellis looks at his career, and his groundbreaking research on voting rights — cited by the Supreme Court of Iowa in a momentous decision. His work is helping disenfranchised citizens across the country gain a voice in our democracy. Because a better future starts with a bold leap.

MOUNTAINEERS GO FIRST.

www.BiosimilarsResourceCenter.org

The New Biosimilars Resource Center, or BRC, is your stop for unbiased, up-to-date information and education on biosimilars.

Designed for pharmacists, physicians, nurses, health plans and other health care stakeholders, BRC content is policy neutral and non-promotional. AMCP, in partnership with American Association of Colleges of Pharmacy, America's Health Insurance Plans, the American Pharmacists Association, the American Society of Consultant Pharmacists, the Hematology/Oncology Pharmacists Association, the National Alliance of State Pharmacy Associations, and the National Community Pharmacists Association, developed the BRC because:

- Biosimilars have the potential to decrease U.S. health care costs and improve access to needed treatments;
- Increased awareness and understanding of biosimilars among health care providers and patients are critical to facilitating their adoption and use in a safe and effective manner; and
- Pharmacists, physicians, and nurses need ready access to information on the latest scientific advances around biosimilars.

The BRC provides the latest, evidence-based educational tools and training materials, including fact sheets, web-based educational seminars, continuing education courses and journal articles. All content is reviewed by independent, scientifically trained experts.
